

Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

According to data from the

Statistics (BTS) of the United

flights were delayed during

equivalent to 41 billion US\$.

Bureau of Transportation

Stated, over 20% of US

2018, which resulted in a

severe economic impact

Does

What behavior have we observed?

What can we imagine them doing?

Thinks

This paper aims to prove

that Stacking algorithm has

advantages in airport flight

delay prediction, especially

for the algorithm selection

Feels

What are their fears, frustrations, and

anxieties? What other feelings might

influence their behavior?

problem of machine

learning technology.

ultimately causes stress

among passengers.

The airlines are victims of

consumption while trying to

many others which together

tamper their reputation and

reduce elapse times, and

often result in a loss of

demand by passengers.

extra costs associated to

their crews, aircraft

repositioning, fuel
